/ PROJECTS

Name: ENCORE

URL: Encore

APP: Encore Telecaller, Inventory

Environment: Vue.js, Quasar, SpringBoot, PostgreSQL

Domain: Telecalling and Educational Management System

Project Contribution:

- **Telecaller System:** Developed a Vuejs frontend for telecallers to manage customer details and follow-up on exam course promotions.
- **Multitenancy with Spring Boot:** Implemented Spring Boot with PostgreSQL to ensure data security and isolation for different clients.
- **Admin Role:** Introduced an admin role to manage telecaller activities, enquiries, admissions, and user creation.
- **Lead Management:** Implemented manual lead creation and bulk lead upload, with features to assign telecallers for follow-ups.
- **Super Admin:** Created a super admin role for team creation and management, with separate data for each team.
- **Customer Transition:** Focused on transitioning customer statuses from enquiry to admission, including course purchase logic.
- **Call Monitoring:** Admin panel displays telecaller call logs for monitoring, including call counts and speaking time analysis.
- **Inventory System:** Developed a Vuejs frontend for inside staffs, workers to manage courses, books and follow-up on storage purpose.
- **HR & Admin Role:** Introduced an HR role as well as admin to manage storage activities, inventories, and necessity needs.
